LIST OF CLINICAL PUBLICATIONS

Straumann® Emdogain

COMMITTED TO SIMPLY DOING MORE FOR DENTAL PROFESSIONALS
Straumann is industrial partner of ITI (International Team for Implantology) in the areas of research, development and education.
Abbas F, et al
Surgical treatment of gingival recessions using Straumann® Emdogain: Clinical Procedure and Case Reports.

Araújo M G
Furcation defect healing after GTR with and without Straumann® Emdogain application.

Araújo M G, Lindhe J
GTR treatment of degree III furcation defects following application of enamel matrix proteins. An experimental study in dogs.

Berlucchi I, et al
Enamel Matrix Proteins (Straumann® Emdogain) in Combination with Coronally Advanced Flap or Subepithelial Connective Tissue Graft in the Treatment of Shallow Gingival Recessions.

Berlucchi I, Francetti L, Del Fabbro M, Basso M, and Weinstein RL
The Influence of Anatomical Features on the Outcome of Gingival Recessions Treated With Coronally Advanced Flap and Enamel Matrix Derivative: A 1-Year Prospective Study.

Biancu S
Surgical treatment of angular defects. Possible technical alternative.

Biancu S
Muco-Gingival therapy in gingival recession.
Il Dentista Moderno 1998; 8: 105-111.

Bosshardt D.D.
Are Cementoblasts a Subpopulation of Osteoblasts or a Unique Phenotype?
J Dent Res 84 (5); 390-406.

Bosshardt D, Sculean A, Windisch P, Pjetursson B, Lang NP
Effects of enamel matrix proteins on tissue formation along the roots of human teeth.

Boyden B D, et al
Porcine Fetal Enamel Matrix Derivative Enhances Bone Formation Induced by Demineralized Freeze Dried Bone Allograft In Vivo.

Comparison of ready-to-use Straumann® Emdogain and Straumann® Emdogain in patients with chronic adult periodontitis.

Briguglio R, Franchina A, Briguglio E

Camargo P M, et al
The effectiveness of enamel matrix proteins used in combination with bovine porous bone mineral in the treatment of intrabony defects in humans.

Cardaroli L

Cardaroli G, Leonhardt A S
Enamel matrix proteins in the treatment of deep intrabony defects.
**Carnio J, et al**

Histological Evaluation of 4 Cases of Root Coverage Following a Connective Tissue Graft Combined With an Enamel Matrix Derivative Preparation.

**Cassiano K. Rösing, Anne M. Aass, Antonios Mavraopoulos, and Per Gjermo**

Clinical and Radiographic Effects of Enamel Matrix Derivative in the Treatment of Intrabony Periodontal Defects: A 12-Month Longitudinal Placebo-Controlled Clinical Trial in Adult Periodontitis Patients.

**Chen L, et al**

Root Coverage with Enamel Matrix Derivatives.

*Compend Contin Educ Dent* 2002; 23: 797-800, 802, 804 passim; quiz 808.

**Chiantella G C, Sculean A**

Infrabony Defects: Active Principle for Periodontal Regeneration.

*Dental Cadmos* 1998; 1: 45-51.

**Chiantella G C, Sculean A**

Terapia combinata di difetti infraossei.

AMELOGENINA E OSSO DEPROTEINIZZATO.

**Chiantella G C, Sculean A**

Uso combinato RGT ed EMD nelle lesioni infraossee.

**Cochran D L, et al**

Periodontal Regeneration with a Combination of Enamel Matrix Proteins and Autogenous Bone Grafting.

**Cochran D L, et al**

The effect of Enamel Matrix Proteins on Periodontal Regeneration as determined by histological analyses.

**Cochran D.L, Jones A., Heijl L, Mellonig T., Schoolfield, King G.**

Periodontal Regeneration with a combination of enamel matrix proteins and autogenous bone grafting.

**Donos N, et al**

Clinical Evaluation of an Enamel Matrix Derivative in the Treatment of Mandibular Degree II Furcation Involvement: A 36-Month Case Series.

**Donos N, et al**

Wound healing of degree III furcation involvements following guided tissue regeneration and/or Straumann® Emdogain.

*A histologic study.*

**Eger T, Müller H P**

Periodontal regeneration in vertical bone defects with re-absorbable membranes and enamel matrix proteins. A comparative clinical study.

**Esposito M, Coulthard P, Thomsen P, Worthington HV**

Enamel Matrix Derivative for Periodontal Tissue Regeneration in Treatment of Infrabony Defects: A Cochrane Systematic Review.

*Journal of Dental Education, Volume 68, number 8: 834-844.*

**Filippi A, et al**

Treatment of replacement resorption with Straumann® Emdogain – preliminary results after 10 months.

*Dental Traumatology* 2001; 17: 134-138.

**Filippi A, Pohl Y, von Arx T**

Treatment of replacement resorption with Straumann® Emdogain – a prospective clinical.

*Dental Traumatology* 2002; 18: 138-143.

**Francetti L, Del Fabbro M., Basso M, Testori T, Weinstit R**

Enamal matrix proteins in the treatment of intra-bony defects, a prospective 24-month clinical trial.

Francetti L, et al

Froum S J, et al

Froum S J, et al

Gestrelius S, et al

Gestrelius S, et al

STR AU MANN® EMD OGAIN – LIST OF CL IN ICAL PUBL I CAT I ONS

Heden G
A Case Report Study of 72 Consecutive Straumann®
Emdogain-Treated Intrabony Periodontal Defects:
Clinical and Radiographic Findings After 1 Year.

Heden G, Wennström J, Lindhe J
Periodontal tissue alterations following Straumann®
Emdogain treatment of periodontal sites with angular
bone defects. A series of case reports.

Heden G, Wennström JL
Five-Year Follow up of Regenerative Periodontal Therapy
With Enamel Matrix Derivative a Sites With Angular
Bone Defects.
J Periodontol February 2006; 295-301.

Heinzb
Einsatz von Straumann® Emdogain zur Deckung gingi-
valer Rezessionen.
ZMK (21) 6/05. 396-403.

Heijl L
Periodontal regeneration with enamel matrix derivative in

Heijl L, et al
Enamel matrix derivative (Straumann® Emdogain) in the
treatment of intrabony periodontal defects.

Heijl L
Periodontal regenerative potential using enamel matrix
proteins (Straumann® Emdogain).

Heijl L, Gestrelius St
Treatment of intrabony defects with periodontal surgery
and adjunctive Straumann® Emdogain, a review and
meta-analysis involving all studies with at least
Scientific report 02/01 Biora.

Hirooka H
The biologic concept for the use of enamel matrix
protein: True periodontal regeneration.

Hoang A M, Oates T W, Cochran D L
In vitro Wound Healing Responses to Enamel Matrix
Derivative.

Hägewald S, et al
Comparative study of Straumann® Emdogain and coro-
nally advanced flap technique in the treatment of human
gingival recessions. A prospective controlled clinical
study.

I

Ito K, Owa M
Connective Tissue Grafting for Root Coverage in Multiple
Class III Gingival Recessions With Enamel Matrix Deriva-
tive: A Case Report.
Pract Periodont Aesthet Dent 2000; 12(S): 441-446.

Iqbal M K, Bamaas N
Effect of enamel matrix derivative (Straumann® Emdogain)
upon periodontal healing after replantation of permanent
incisors in Beagle dogs.
Dental Traumatology 2001; 17: 36-45.

K

Kalpidis C D R, Ruben M
Treatment of Intrabony Periodontal Defects With Enamel
Matrix Derivative: A Literature Review.

Kawase T, et al
Cytostatic action of enamel matrix derivative (Straumann®
Emdogain) on human oral squamous cell carcinoma-
derived SCC25 epithelial cells.

Kawase T, et al
Enamel matrix derivative (Straumann® Emdogain) rapidly
stimulates phosphorylation of the MAP kinase family
nuclear accumulation of smad2 in both oral epithelial
and fibroblastic human cells.
Kenny D, et al

Lekovic V, et al
A Comparison Between Enamel Matrix Proteins Used Alone or in Combination with Bovine Porous Bone Mineral in the Treatment of Intrabony Periodontal Defects in Humans.

Lekovic V, et al
Combination Use of Bovine Porous Bone Mineral, Enamel Matrix Proteins, and a Bioabsorbable Membrane in Intrabony Periodontal Defects in Humans.
J Periodontol 2001; 583-589.

Lekovic V, et al
The Use of Bovine Porous Bone Mineral in Combination With Enamel Matrix Proteins or With an Autologous Fibrinogen/Fibronectin System in the Treatment of Intrabony Periodontal Defects in Humans.
J Periodontol 2001; 1157-1163.

Lyngstadaas S P, et al
Autocrine Growth Factors in Human Periodontal Ligament Cells Cultured on Enamel Matrix Derivative.

Mack F., Mundt T., Mojon P., Kocher T., Schwahn C., Bernhardt O., John U., Biffar R.

Manor A
Periodontal Regeneration with Enamel Matrix Derivative – Case Reports.

Matsou M, et al
Vascular Regeneration after Tooth Replantation with Application of Enamel Matrix Derivative (EMD).

McGuire M K, Nunn M
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters.

McGuire M K, Cochran D L
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation.

Minabe M, et al
A Comparative Study on Combined Treatment with a Collagen Membrane and Enamel Matrix Proteins for the Regeneration of Intrabony Defects.

Mellonig J
Enamel Matrix Derivative for Periodontal Reconstructive Surgery: Technique and Clinical and Histologic Case Report.

Modica F, et al
Coronally Advanced Flap for the Treatment of Buccal Gingival Recessions With and Without Enamel Matrix Derivative. A Split-Mouth Study.

Mombelli A, Brochut P, Plagnat D, Casagni F, Giannopoulou C
Enamel matrix proteins and systemic antibiotics as adjuncts to non-surgical periodontal treatments: clinical effects.

Mombelli, Brochut P, Plagnat D, Casagni F and Giannopoulou C
Clinical effects of Straumann® Emdogain and antibiotics in non-surgical periodontal therapy.
University of Geneva, Geneva, Switzerland.

Richter St, Meyle J, Jepsen S, Heinz B, Reich E, Gonzales J, Bödeker R, Sculean A, Hoffmann T

Rösing C, Aass A, Mavropoulos A and Gjermo P
**STRAUMANN® EMDOGAIN – LIST OF CLINICAL PUBLICATIONS**

**Rosen P S, Reynolds M A**

**Schwartz Z, et al**

**Sanz M, Tonetti M, Zabalegui I, et al.**
Treatment of Intrabony Defects With Enamel Matrix Proteins orBarrier Membranes: Results From a Multicenter Practice-Based Clinical Trial. J Periodontal May 2004; 726-732.

**Sato S, Yamada K, Haryu K, Ito K**

**Scheyer E T, et al**

**Sculean A, Barbé G, Chiantella G C, Arweiler N B**
Clinical evaluation of an enamel matrix protein derivative combined with a bioactive glass for the treatment of intrabony periodontal defects in humans. J. Periodontol 2002; 73, No 4: 401-408.

**Sculean A, Reich E**
Treatment of intrabony bone defects using Straumann® Emdogain. Case Reports. Deutsche Zahnärztliche Zeitschrift 1998; 6, 53rd Year.

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**

**Sculean A, et al**
Sculean A, et al  
Treatment of advanced intrabony defects with enamel matrix proteins (Straumann® Emdogain) combined with a bovine-derived xenograft (Bio-OSS®).  

Sculean A, et al  
Healing of fenestration-type defects following treatment with guided tissue regeneration or enamel matrix proteins. An experimental study in monkeys.  

Sculean A, et al  
Healing of recession-type defects following treatment with enamel matrix proteins or guided tissue regeneration. A pilot study in monkeys.  

Sculean A, et al  
Treatment of intrabony defects with guided tissue regeneration and Enamel-matrix proteins.  

Sculean A, et al  
Treatment of intrabony defects with enamel matrix proteins and guided tissue regeneration. A prospective controlled clinical study.  

Sculean A, et al  
Effect of an enamel matrix protein derivative (Straumann® Emdogain) on ex vivo dental plaque vitality.  

Sculean A, et al  
Patterns of cytokeratin expression in monkey and human periodontium following regenerative and conventional periodontal surgery.  

Sculean A, et al  
The Effect of Postsurgical Antibiotics on the Healing of Intrabony Defects Following Treatment With Enamel Matrix Proteins.  

Sculean A, et al  
Treatment of Intrabony Defects With Enamel Matrix Proteins or Bioabsorbable Membranes. A 4-Year Follow-Up Split-Mouth Study.  

Sculean A, et al  
Clinical evaluation of an enamel matrix protein derivative combined with a bioactive glass for the treatment of intrabony periodontal defects in humans.  

Sculean A, et al  
Clinical Evaluation of an Enamel Matrix Protein Derivative (Straumann® Emdogain) Combined with a Bovine-Derived Xenograft (Bio-Oss) for the treatment of Intrabony Periodontal Defects in Humans.  

Sculean A, et al  
Presence of an enamel matrix protein derivative on human teeth following periodontal surgery.  

Sculean A, et al  
Clinical and histological evaluation of human intrabony defects treated with an Enamel Matrix Protein Derivative combined with a bovine-derived xenograft.  

Sculean A, et al  
Four-year results following treatment of intrabony periodontal defects with an enamel matrix protein derivative: a report of 46 cases.  

Sculean A, et al  
Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of enamel matrix derivative.  
Sculean A., DMD, Dr. med. Dent., MS, PhD, Windisch P., DMD, Keglevich T., DMD, Gera I., DMD PhD
Klinische und histologische Auswertung eines Schmelzmatrix-Proteinderivats in Kombination mit einem bioaktiven Glas zur Behandlung von paradontalen Knochendefekten beim Menschens.

Sculean A, Chiantella GC, Windisch P, Arweiler NB, Brecx M, Gera I.
Healing of intra-bony defects following treatment with a composite bovine-derived xenograft (Bio-Oss Collagen) in combination with a collagen membrane (Bio-Gide PERIO).

Sculean A, Windisch P, Keglevich T, Gera I
Histological evaluation of an enamel matrix protein derivative combined with a bioactive glass for the treatment of advanced intra-bony periodontal defects in humans.

Sculean A, Windisch P, Auschill TM, Dori F
Treatment of Peri-Implantitis with EDTA Decontamination and Application of an Enamel Matrix Protein Derivative – a Report of 3 Cases.
Perio 2004; Volume 1: 133-141.

Siervo S, Coraini C
Muco-gingival and regenerative therapy with amelogenins.
Dental Cadmos 1998; 20: 37-42.

Silvestri M
The Use of the Amelogenenic Protein Matrix (Straumann® Emdogain) in the Treatment of Infrabony Defects. Clinical Case.

Silvestri M, Rasperini G, Euwe E
Enamel matrix derivative in treatment of infrabony defects.
Practical Periodontics & Aesthetic Dentistry 1999; 11: No. 5.

Silvestri M, et al
Comparison of treatments of infrabony defects with enamel matrix derivative, guided tissue regeneration with a non-resorbable membrane and Widman modified flap. A pilot study.

Silvestri M, et al
Comparison of intra-bony defects with enamel matrix derivative versus guided tissue regeneration with a nonresorbable membrane. A multicenter controlled clinical trial.

Spahr A
Clinical application of Straumann® Emdogain.

Spahr A, Hammarström L
Response of dental follicular cells to the exposure of denuded enamel matrix in rat molars.

Spahr A, Haegewald S, et al.

Spahr A, et al
Effect of the enamel matrix derivative Straumann® Emdogain on the growth of periodontal pathogens in vitro.

Suzuki N, et al
Attachment of Human Periodontal Ligament Cells to Enamel Matrix-Derived Protein Is Mediated Via Interaction Between BSP-Like Molecules and Integrin αnβ3.

Suzuki S., Nagano T., Yamakoshi Y., Gomi K., Arai T., Fukae M., Katagiri T., and Oida S.
Enamel Matrix Derivative Gel Stimulates Signal Transduction of BMP and TGF – β.
T

Tokiyasu Y, et al
Enamel factors regulate expression of genes associated with cementoblasts.

Tonetti M, et al
Enamel matrix proteins in the regenerative therapy of deep intrabony defects: A multicenter randomized controlled clinical trial.

Trabulsi M., Oh TJ., Eber R., Weber D., and Wang H.-L.
Effect of enamel matrix derivative on collagen guided tissue regeneration-based root coverage procedure.
J Periodontol November 2004, Volume 75; 1446-1457.

Trieger N
An oral surgeon’s evaluation of Straumann® Emdogain.

Trombelli L, Bottega S, Zucchelli G
Supracrestal soft tissue preservation with enamel matrix proteins in treatment of deep intrabony defects.

Trombelli L, et al.
A systematic review of graft materials and biological agents for periodontal intraosseous defects.

Trombelli L, et al.
Autogenous bone graft in conjunction with enamel matrix derivative in the treatment of deep periodontal intraosseous defects: A report of 13 consecutively treated patients.

Trope M
Clinical management of the avulsed tooth: Present strategies and future directions.

Tynelius-Bratthall G, Söderholm G
Is periodontal regeneration clinically predictable?

V

Van der Pauw M, et al
Enamel matrix-derived protein stimulates attachment of periodontal ligament fibroblasts and enhances alkaline phosphatase activity and transforming growth factor β1 release of periodontal ligament and gingival fibroblasts.

Veis A
Amelogenin gene splice products: potential signalling molecules.

Velasquez-Plata D, Scheyer E T, Mellonig J T
Clinical comparison of an enamel matrix derivative used alone or in combination with a bovine-derived xenograft for the treatment of periodontal osseous defects in humans.

Wachtel H, et al
Microsurgical access flap and enamel matrix derivative for the treatment of periodontal intrabony defects: a controlled clinical study.

Wennström J, et al
Some effects of enamel matrix proteins on wound healing in the dento-gingival region.

Windisch P, et al
Comparison of clinical, radiographic, and histometric measurements following treatment with guided tissue regeneration or enamel matrix proteins in human periodontal defects.

Y

Yilmaz S, Kuru B, Altun-Kirac E
Enamel matrix proteins in the treatment of periodontal sites with horizontal type of bone loss.
Yukna R A, Mellonig J
Histological Evaluation of Periodontal Healing in Humans
Following Regenerative Therapy with Enamel Matrix
Derivative. A 10-Case Series.

Zaher C-A, Hachem J, Puhan MA, Mombelli A.
Interest in periodontology and preferences for treatment
of localized gingival recessions A survey among Swiss
dentists.

Zetterström O, et al
Clinical safety of enamel matrix derivative [Straumann®
Emdogain] in the treatment of periodontal defects.

Zucchelli G, et al
Enamel Matrix Protein and Guided Tissue Regeneration
With Titanium-Reinforced Expanded Polytetrafluoroethylene Membranes in the Treatment of Infrabony Defects:
A Comparative Controlled Clinical Trial.
J Periodontol 2002; 73: 3-12.

Zucchelli G, et al
Enamel matrix proteins and bovine porous bone mineral
in the treatment of intrabony defects: A comparative
controlled clinical trial.
